

AADHAR HOUSING FINANCE LIMITED
CIN U66010KA1990PLC011409

Summary of Material accounting policies and other explanatory information

The inputs used and process followed by the Group in determining the increase in credit risk have been detailed in Note 38.

EIR

The Group's EIR methodology, recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected behavioural life of loans given.

This estimation, by nature, requires an element of judgement regarding the expected behaviour and life-cycle of the instruments, as well as other fee income/expense that are integral parts of the instrument.

Share-Based Payments

Estimating fair value for share-based payment transactions requires use of an appropriate valuation model. The Group measures the cost of equity-settled transactions with employees using Black-Scholes Model to determine the fair value of the options on the grant date.

Inputs into the valuation model, includes assumption such as the expected life of the share option, volatility and dividend yield.

Further details used for estimating fair value for share-based payment transactions are disclosed in Note 42.

Following abbreviation to be read as :

“ESOP” - Employee Stock Option Plan

“ESAR” - Employee Stock Appreciation Rights

Business model assessment

The Parent Company's business model objective is to hold financial assets in order to collect contractual cash flows. The contractual terms of the financial asset give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding on specified dates, accordingly entire Loan Portfolio is classified at amortised cost.
