

AADHAR HOUSING FINANCE LIMITED
CIN U66010KA1990PLC011409

Summary of Material accounting policies and other explanatory information

The interest income on non-credit impaired financial assets is calculated by applying the EIR to the gross carrying amount (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). Interest income on credit-impaired financial assets is calculated on net carrying value (i.e. the gross carrying amount less the allowance for expected credit losses (ECLs)).

b. Fee and commission income:

Fee and commission, other than the fee that forms an integral part of EIR, are accounted on accrual basis.

c. Dividend income

Dividend income is recognised when the Group's right to receive dividend is established by the reporting date.

d. Investment income

The gains/losses on sale of investments are recognised in the statement of profit and loss on trade date. Gain or loss on sale of investments is determined on the basis of weighted average cost.

e. Other operating revenue:

Prepayment charges, delayed payment interest and other such incomes where recovery is uncertain are recognised on receipt basis.

2.7 Property, plant and equipment and Intangible Assets

Property plant and equipment (PPE)

PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. PPE is stated at cost less accumulated depreciation/ amortization and impairment losses, if any. The cost of PPE is its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the PPE ready for its intended use, other incidental expenses and interest on borrowing attributable to acquisition of qualifying PPE upto the date the asset is ready for its intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit and loss.

PPEs not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress".

Depreciation is recognised using straight line method so as to write off the cost of the assets (other than freehold land which is not depreciated) less their residual values over their useful lives specified in Schedule II to the Act, or in case of assets where the useful life was determined by technical evaluation, over the useful life so determined. Depreciation method is reviewed at each financial year end to reflect expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end with the effect of any change in the estimates of useful life/residual value is accounted on prospective basis.

Estimated useful life considered by the Group are:

Asset	Estimated Useful Life
Office Equipment and Computers	5 – 10 Years
Furniture and fittings	10 Years
Vehicles	8 Years
Leasehold improvements	Lease Period
Buildings	60 Years
