**Current tax**

The tax currently payable is based on the estimated taxable profit for the complete financial year for each entity of the Group and is calculated using applicable tax rates and tax laws that have been enacted or substantively enacted. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The current tax is calculated using applicable tax rates that have been enacted or substantively enacted by the end of the reporting period.

**Deferred tax**

Deferred tax assets and liabilities are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and each entity of the Group intends to settle its current tax assets and liabilities on a net basis.

**2.17 Special reserve**

The Parent Company creates statutory reserve every year out of its profits in terms of section 36(1)(viii) of the Income Tax Act, 1961 read with section 29C of the National Housing Bank Act, 1987.

**2.18 Impairment reserve**

As per the RBI Circular RBI/2019-20/170 DOR (NBFC).CC.PD.No.109/22.10.106/2019-20 dated 13 March, 2020, in the event of the aggregate impairment provision under Ind AS 109 is lower than that required under the Income Recognition, Asset Classification and Provisioning Norms, then the difference shall be appropriated from the Net Profit or loss after tax to a separate “Impairment Reserve”.

**2.19 Provisions, contingent liabilities and contingent assets**

- Provisions are recognised only when: an entity has a present obligation (legal or constructive) as a result of a past event; and
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation

Provision is measured using the cash flows estimated to settle the present obligation and when the effect of time value of money is material, the carrying amount of the provision is the present value of those cash flows. Reimbursement expected in respect of expenditure required to settle a provision is recognised only when it is virtually certain that the reimbursement will be received.

**Contingent liability is disclosed in case of:**

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- a present obligation arising from past events, when no reliable estimate is possible.
